UNITED STATES DEPARTMENT OF AGRICULTURE  
AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

*- FOREWORD -*

*This report presents in narrative and statistical form the accomplishments of the Michigan Agricultural Stabilization and Conservation Committees in administering farm programs of the United States Department of Agriculture.*

*In its activities, the agency's primary responsibilities are to promote the national welfare and to carry out the legislative intent of the Congress. They include the improvement of the economic stability of agriculture, the maintenance of an even flow of quality products to market at reasonable prices and the improvement and protection of our soil and water resources.*

*We hope that this report will be useful to the many persons and organizations who are interested and concerned with the progress of agriculture in Michigan.*

*We extend our sincere appreciation and thanks to ASC County and Community Committeemen and County office personnel, cooperating agencies and others who have played such an important part in the successful operation of farm programs in 1971.*

*MICHIGAN STATE ASC COMMITTEE*

*Issued April, 1972*

## ADMINISTRATION OF ASCS PROGRAMS

The Agricultural Stabilization and Conservation Service (ASCS) is the agency of the U. S. Department of Agriculture that administers specified commodity and related land use programs designed for voluntary production adjustment, resource protection, and price, market, and farm income stabilization.

Administration of these programs is accomplished through State, County and Community Committees. These committees are composed of farmers who represent various types of farming in the State. They establish the policies that are within their legal and administrative jurisdiction with respect to the operation of all applicable programs of the U. S. Department of Agriculture at the State and County level.

The Michigan State ASC Committee consists of three members appointed by the Secretary of Agriculture. In addition, the Director of Agricultural Extension Service is an ex-officio member of the Committee.

The State Committee is responsible for the administration of farm programs in the State and for general supervision of the work of county committees. The State Committee appoints a State Executive Director who supervises and directs the work of the State Office staff under policies established by the Committee.

The ASC county committee have three farmer-members each, elected by farmer-elected delegates to a county convention. One committeeman is elected each year, with two committeemen being holdovers. The county agricultural extension agent is an ex-officio member of the committee.

Each ASC county committee employs a County Executive Director who, for the committee, hires the necessary employees for office and field work and sees that the day-to-day office operations are effectively performed. The county committee, however, is responsible for programs and administrative policies and decisions at the county level.

## PART II

### RURAL ENVIRONMENTAL ASSISTANCE PROGRAM

The Rural Environmental Assistance Program (REAP) is the successor to the Agricultural Conservation Program. It is the principal channel through which the Federal Government shares with farmers and ranchers, the cost of carrying out approved soil, water, woodland, and wildlife conservation and pollution abatement practices on their land. The program is entirely voluntary and assistance is made available for practices over and above what farmers would carry out with their own resources and on their own initiative.

REAP cost-sharing assisted farmers in the Northwest Michigan Resource Conservation and Development Project to carry out and accelerate needed soil and water conservation practices in the project area. The program also assisted farmers in carrying out practices in watershed areas approved under Public Law-566.

Twenty-one Special Projects dealing primarily with livestock waste and the establishment and improvement of vegetative cover for livestock were approved under the program. Most of these special projects were carried out in the Upper Peninsula. Pollution abatement practices were carried out on 181 farms and cost-sharing amounted to \$194,346. It is estimated that cost-sharing represented 20 to 25% of the total cost to farmers.

Technical assistance for permanent type practices are provided by the Soil Conservation Service, U.S. Forest Service and others.

Activity for the past five years is listed below.

YEAR	:	PARTICIPATING	:	TOTAL GROSS
	:	FARMS	:	EXPENDITURES
1967	:	* 24,701	:	* \$ 5,408,825

### PART III

#### WILD HEMP ELIMINATION PROGRAM

In 1971 a pilot program was aimed at finding ways of controlling wild hemp weed or marijuana plants on farmland in Cass County. The Bureau of Narcotics and Dangerous Drugs of the Department of Justice cooperated in the program and furnished the funds. A. S. C. S. with the assistance from the Extension Service in Cass County administered the cost-sharing program.

It was estimated that 90 acres of wild hemp was growing in the county. A total of \$1,122 was paid on 5 farms covering treatment of 70 acres. Several other farmers destroyed marijuana plants growing wild on their farms without cost-sharing. These small areas were generally destroyed by pulling or cutting by hand.

## PART IV

### 1971 FEED GRAIN PROGRAM

The Agricultural Act of 1970 initiated a cropland set-aside approach for participating producers in the voluntary wheat, upland cotton, and feed grain programs. These programs are designed to help farmers shift to a market-oriented agriculture.

Program goals included those to give farmers more opportunity for decision making on their farms; to protect and improve farmers' income; to keep agricultural production in line with anticipated needs and to put a greater reliance on the market place as the principal source of farm income. Feed grains include corn grain sorghum and barley, however, barley was not included in the 1971 program.

To participate in the 1971 program a farmer agreed to set-aside from production 20 percent of his feed grain base acres and devote them to approved soil-conserving use while continuing to maintain his conserving base acres. In Michigan he is then free to plant his remaining cropland to any crop he wishes.

Set-aside payments for a farm were calculated on half of the feed grain base acreage multiplied by the farm yield times the payment rate per bushel. A producer who complied with set-aside and conserving base requirements could receive payments on half of his base acreage whether he planted feed grains or not.

Listed below is a summary of participation by Michigan farmers in the Feed Grain Program for the years 1967-1971:

<u>Year</u>	<u>Participants</u>	<u>Acreage Diverted</u>	<u>Payments</u>	
			<u>Diversion</u>	<u>Price Support</u>
1967	44,644	413,183	\$18,856,619	\$7,589,683
1968	50,300	802,675	25,433,311	8,422,539
1969	54,624	883,103	27,968,888	8,979,106
1970	53,910	849,905	24,258,541	8,985,220
<u>Year</u>	<u>Participants</u>	<u>Acreage Set-Aside</u>	<u>Set-Aside Payments</u>	
1971	65,670	350,534	\$20,261,764	

The Agricultural Act of 1970 changed the basis for determining and identifying program payments.

## PART V

### 1971 WHEAT PROGRAM

The goals for this program were the same as for the 1971 Feed Grain Program also included in this report.

To participate in the 1971 program, in Michigan a farmer agreed to set-aside from production an acreage equal to 75 percent of the farm's domestic allotment. After maintaining his set-aside and conserving base, a producer could raise as much wheat as he desired, and plant his remaining acres to crops of his choice.

Participants in the 1971 Wheat Program could receive price support on all of their wheat crop but were eligible for wheat certificate payments only on the portion included in the domestic allotment.

#### WHEAT PROGRAMS 1967 - 1971

<u>Program Year</u>	<u>Number of Participants</u>	<u>Acreage Diverted</u>	<u>Total Payments</u>
1967	38,284	1/	\$14,505,129
1968	42,258	1/	16,066,395
1969	61,575	251,618	22,350,310
1970	61,670	434,869	20,523,179
<u>Program Year</u>	<u>Number of Participants</u>	<u>Acreage Set-Aside</u>	<u>Set-Aside Payments</u>
1971	63,992	234,840	\$20,711,118

1/ The Agricultural Act of 1970 changed the basis for determining and identifying program payments.

## PART VII

### LAND RETIREMENT PROGRAMS

These programs provide for shifting cropland presently not needed for agricultural production into long-term conservation, recreational and open space use. Participants receive adjustment payments related to the value of crops normally produced on the land. Programs included under this category are the Cropland Adjustment and Cropland Conversion Program.

The Cropland Adjustment Program which included (Greenspan), authorized in 1965 was offered on only a limited scale during 1966 and 1967 with agreements entered into for periods up to 10 years. The Greenspan provision provided for more open space and other recreational opportunities for urban areas. Specific incentives were offered to farmers if they shared their land facilities with the public (public access).

The Cropland Conversion Program was offered on a pilot basis during the period 1963-67 with agreements for periods up to ten years. The program was designed to improve family farm income by helping farmers convert cropland primarily that was used for the production of surplus row crops and small grains, to long-range income producing uses, such as forests, grass, water storage, wildlife habitat, or recreational facilities. There are only two agreements in effect in Michigan, one in Dickinson County and one in Grand Traverse County. A total of 156.7 acres are under agreement. No payments were made in 1971.

A summary of acreage and payments for the Cropland Adjustment Program is shown on the following pages.

## COMPLIANCE AND AERIAL PHOTOGRAPHY

The Compliance and Aerial Photography Division is responsible for obtaining acreage determinations and checking compliance of farmers under various ASCS farm programs. Compliance is determined in two ways: one method is called producer certification, the other method is an on-farm inspection measurement by farm reporters.

The certification method consists of farmers visiting the county office and certifying compliance with their program intentions. Photocopies are used in certifying compliance. They are exact reproductions of aerial photo enlargements on file in the county office.

If the producer wishes to know the exact acreage of a given area he may obtain this information by requesting measurement service. This service is provided by the county ASCS office at a nominal charge.

## PART IX

### PRICE SUPPORT PROGRAM

Price support is achieved through loans, purchases and payments for eligible commodities, all at announced levels. Legislation was designed to make some export commodities more competitive in world markets through market price support at or near world price levels. At the same time, grower's incomes are protected by supplementary price support payments, and -- in the case of wheat -- issuance of wheat marketing certificates which bring returns to participating growers to full parity on the domestically-consumed portion of the crop.

For most commodities, loans are made directly to producers on the unprocessed commodity through ASCS county offices. Smaller amounts of grains are also purchased from producers.

Loans are available for periods of six to eight months following harvest. Depending on the commodity, loans generally mature one month following the end of loan availability. Purchases from producers are made at the time of loan maturity for the crop.

Price support loans to producers are "nonrecourse." With this type of loan, producers are not obligated to make good any decline in the market price of the commodity they have put up as collateral. If market prices rise above support prices, producers can pay off their loans and market their commodity. If market prices fail to rise above support prices, producers can deliver the commodity to CCC, with appropriate adjustments for quality and quantity, and discharge their obligation in full.

Support loans and purchases give farmers a ready means of promoting more orderly marketing, particularly in periods when bountiful harvest supplies threaten to push prices of farm commodities down to unfair levels.

In recent years farmers also have been able to continue their loans on certain grains in farm storage beyond the first year, earning storage payments during the announced loan extension (reseal) period.

PART X  
EMERGENCY LIVESTOCK FEED PROGRAM  
1970 - 1971

This program is designed to help maintain foundation livestock herds which might otherwise be liquidated because of a disaster which places undue financial hardship on producers.

Operation of the program is limited to those areas which have been designated emergency areas by the Secretary of Agriculture. The program may not operate in those areas, unless there is a proven need for it.

Under this program, eligible livestock owners may purchase CCC-owned feed grains at not less than 75 percent of the county price support rate for foundation herds and breeding stock and at the full support price for other livestock owned at least six months.

Pricing of Livestock Feed Program grain was established on a base price of the county loan rate plus 13 cents and 19 cents per bushel for barley and corn, respectively, and the county loan rate for oats. Prices for grain used for foundation herds and breeding stock were at 80 percent of the base price prior to May 20, 1971, and at 75 percent of the base price on and after May 21, 1971, through the end of the program. Prices for other livestock were at 105 percent of the base price prior to May 20, 1971, and on and after that date, it was 100 percent of the base price. The change in pricing was due to a change in program policy.

Due to a severe drought in Benzie, Grand Traverse and Manistee Counties during the growing season of 1970 and excessive rainfall at harvest time in Chippewa County, the four counties were designated as disaster areas by the Secretary of Agriculture in December, 1971 and January, 1972. A total of 143 producers qualified for assistance under this program. They were able to purchase 86,795 bushels of corn, oats and barley at a total savings of approximately \$73,536.00.

Listed on the following page is a breakdown by county of sales of CCC-owned grain. The amounts listed under "Primary" were used for foundation herds, and the amounts listed under "Secondary" were used for other livestock. Only those counties and districts where sales were made are listed.

## PART XI

### FARM STORAGE AND DRYING EQUIPMENT LOAN PROGRAMS

Under this program eligible farmers can obtain Commodity Credit Corporation (CCC) loans from their county ASCS offices to finance on-farm storage and drying facilities needed for grain and other commodities. Adequate on-farm storage and drying capacity enables a farmer to do a better job of utilizing his crops and lessens the possibility of his getting caught in a transportation bottle-neck or in a market glut.

In general these loans are available for up to 85% of the total cost of the facilities and are repayable in four equal installments over a period of five years at low interest rates.

CCC-OWNED GRAIN STORAGE

The CCC-owned Grain Storage Program in Michigan consists of 17 binsites located in 12 counties. The binsites contain 1399 silo-type and 24 quonset-type structures with a total storage capacity of 5,559,512 bushels.

## PART XIII

### WOOL AND MOHAIR PROGRAM

The National Wool Act of 1954, provides that support of the prices for wool and mohair may be carried out through payments to producers.

The Agricultural Act of 1970 amended the National Wool Act to establish for the three marketing years beginning January 1, 1971, and ending December 31, 1973, the support price for shorn wool at 72 cents per pound, grease basis, and the support price for mohair at 80.2 cents per pound, grease basis.

The program is designed, through use of annual payments, to support the returns to producers from wool and mohair.

The total amount of payments under the program is limited to 70 percent of the accumulated totals of duties collected on imports of wool and wool manufactures.

Marketing Year	: Average Price : Received Per : Pound - Wool	: RATES OF PAYMENT		: *Total Payments
